### About This Game

Brimstone Brawlers is an action packed beat'em up full of strangely aggressive brawlers set in a fantasy Victorian era world.

Pick from an early line up of peculiar brawlers with different abilities and play styles.

There is a selection of action packed levels, ranging from simple arenas like Tavern and Rooftops to the super dangerous Train Station.

While protecting yourself from the onslaught of other brawlers, remember to watch your step as the levels are full of hazards and dangers, use these to your advantage and outplay your opponents.

### Features

Below are some of the mechanics and features you will experience in your average everyday brawls.

- Projectiles collide in Brimstone, so a good offence is usually the best defence!
- Abilities interact with each other, ignite arrows, knock projectiles away, even cause stunning explosions.
- The streets are filled with trash. Pick up powerful items and use them to wreak havoc.

- 
- Throw things at your friends. Then trash talk them with taunts and emotes!
  - Eat some pie and unleash powerful abilities to turn your enemies into mush!
  - The levels are riddled with screamingly unnecessary explosive dangers. Use them to your advantage!

#### Lore

"Battlements gaze down from the mountain above the once mighty city of Brimstone - now obscured from sight. The era of enlightenment that had once fuelled new innovations and scientific discoveries has now turned to time of onslaught from a new industrial age.

Haze smothers the city, the canals are clogged with putrid filth and the citizens are reeling with fear. For those not struck down by illness or devoured by the grinding teeth of machinery, there is little hope. From within the shadows, a more sinister evil stirs.

Grotesque scenes of supernatural happenings are emerging, leading to rumours from the already trembling people. Glimpses of ghastly figures in the shadows, monsters roaming the streets and dark powers dwelling in the citadel.

Adding fuel to the inferno of misfortune, deep within the bowels of the city there are whispers of a new discovery - a haunting, corrupting, sulfuric substance, known only as plague fire.

With terror around every corner, the civilisation teeters on the brink of chaos. While some search for ways to benefit from the recent turmoil, hunters and healers of ageing ideals have entered the streets seeking to purge the city of evil. With most citizens in hiding, confronting those still walking the streets will often lead to all out brawls."

<b>BASIC'S AND MORE</b>	<b>Basic Strategy</b>
Search Card	There are a few basic points of strategy that you can apply to all variants of poker. If you understand these basic ideas then you can significantly enhance your poker skills.
Strategy	
Hand Selection	<b>A Skilled Player Will Beat An Unskilled Player</b>
<b>Poker Variants</b>	This is the fundamental truth that must be understood to make money in poker. Whatever you may believe about luck, how good your poker face is, or how the moon cycles affect the cards deck, poker is a game of skill. Knowing how skilled you are, and trying to pick opponents that are less skilled, is fundamental to achieving success in poker.

<b>STRATEGY (MISC)</b>	<b>Know When To Fold</b>
Game Settings	More important than knowing what to do with a good hand in poker, is knowing what to do with a bad hand. A big mistake many beginners make is to call on every hand they receive until they see what their final hand is. What this means is that on the losing hands you will lose much more than you would have if you'd folded after the initial deal, making it harder to break even on your winning hands.
<b>Hand</b>	<b>Know When To Bluff</b>
Long Term	There are many different strategies for bluffing, one of which is <a href="#">detailed here</a> . Although there are many good strategies, the important thing to know is that bluffing is not something that you should just do when you feel like tricking the other player. Calculate when best you feel that your bluff will work, and how you can further develop the ratty through the plays you make.
<b>Various Strategy</b>	<b>And Finally...The Golden Rule</b>
Five Card Draw	The one rule that applies to any game of chance is this:
Four Card Stud	"BET WHEN THE ODDS ARE IN YOUR FAVOR AND YOU WILL MAKE MONEY OVER THE LONG TERM"
Five Card Stud	Know, there are two parts to that rule. The first part we have discussed. The <a href="#">second one</a> however is the fact that many good players ignore or forget and can be the downfall of an otherwise very skilled poker player.
